

Numerical control for Press

VisiTouch 19 VisiTouch 19 MX

VisiTouch 19 is an outstanding numerical control for press-brakes composed of two main hardware elements:

- A programming console with 19" modern streamlined glass surface touch screen, generally attached to a swiveling arm.
- A Numerical Control in an all-in-one housing, placed inside the electrical cabinet, with analog and digital I/Os, sufficient to control 4 axes, typically Y1, Y2, X and R. For more complex machines, additional axes and I/O can be added via two CANopen® or one EtherCAT® field buses.

VisiTouch 19 is available in two versions:

- VisiTouch 19 with graphical profile drawing (Touch Profile), precise 2D program and 3D visualization
- VisiTouch 19 MX with 3D visualization, 3D import and full automatic solutions.

In addition to all the features available to control simple as well most sophisticated press brakes, VisiTouch offers also an open system allowing customization.

Main CNC and HMI features

Main features

Based on CybTouch software with a very user friendly HMI thanks intuitive programming and an ease to set up with dedicated wizards (auto-tuning).

All kinematics available for X, Xrelatives, Xslave, R, Rslave, and Z axes. For Back and Front multiples gauges. For bending aids.

Axis control through CANOpen with wide configuration capabilities.

Open system through customizable «User Cycles» and plug-in software modules.

Customizable User buttons for the machine operator.

High-end features

Full 3D visualization and simulation.

Parts management with DXF flat pattern and 3D format files import.

Automatic solutions of complex parts: automatic bend sequencing, gauging, tooling and auto segmentation.

Running under Windows 10 for multitasking and networking.

All bending aid kinematics available. Back and Front multiples sets.

Angle measurement.

Software open features

Interactions with the beam cycle.

Custom auxiliary functions. integration based on «UserCycles» for real time part and on plug-in for HMI part.

Custom User buttons.

Technical Characteristics - VisiTouch 19 programming Console

TFT screen	18.5" wide TFT 16:9
Resolution	1366 x 768, 24 bits (WXGA)
Touch screen	Multi-touch 10 fingers
Operating System	Windows 10
CANopen compatible drives	Baumüller, Delta Electronics, Infranor, INVT, Schneider, etc.
Ethercat compatible drives	Delta Electronics, Infranor, Kollmorgen Europe GmbH, OMRON, Panasonic, Yaskawa Electric, SanyoDenki Co., etc.
Security Systems Compatibilities	Fiessler FMSC, Fiessler FMSC Com, Fiessler FPSC, LazerSafe PCSS, Nuova MCS, etc.
USB ports	1 x USB 2.0, 0.5 A current capability each
Power Supply	+24Vdc @ 0.48A max.
Seal	IP65 - front side only
Handle	Included
Operating conditions	Min. 5° Celsius, max. 40° Celsius. If the ambient temperature approaches or exceeds 40° Celsius, it is advisable to install special ventilation, or even air-conditioning. Relative humidity (10 to 85% non-condensing).
EC Directives	IEC 61131-2
Languages	Chinese (simplified and traditional), Czech, Dutch, English (reference language), Finnish, French, German, Italian, Polish, Portuguese (Brazil and Portugal), Russian, Slovenian, Spanish, Swedish, Turkish.

Intuitive Programming

The VisiTouch 19 is a 2D graphical numerical control for CNC press brakes. It aims at making the operator's work easier, even for demanding programming and setting-up tasks.

The elegant and powerful design and interface let the operator exploit the full range of features with his fingertips. Programming numerical or with the 2D graphical profile and setting up the bending of a part on the large 19" becomes really quick, easy and efficient.

Behind the scene, the VisiTouch 19 is a powerful numerical control that can be adapted to standard press-brakes, up to the most sophisticated models controlling any number of axes.

With its capacity to manage sophisticated features such as complex bending aids, or slave axes, combined with a wide range of parameters allowing a complete use of the press brake performances and setup wizards, the VisiTouch 19 will give a press brake the decisive competitive edge.

Main features for the user

- 19" modern streamlined glass surface touch screen that can be used with gloves.
- User friendly HMI, similar to the CybTouch's one, thanks to an intuitive programming and dedicated set-up wizards (auto-tuning).
- 2D graphical profile drawing (Touch Profile) and precise 2D program creation.
- 3D visualization of imported parts
- Angle measurement with various angle protractors
- Automatic bending sequence calculation.
- Running under Windows 10 for multitasking and networking.
- Internal backup and restore functions.
- Outstanding diagnostic tools.

Main features for the OEM

- All kinematics available for X, Xrelatives, Xslave, R, Rslave, and Z axes. For back and front multiples gauges.
- All bending aid kinematics available. Back and front multiples sets.
- Axis control through CANopen with wide configuration capabilities.
- Customizable User buttons for the machine operator.
- PLC programming for customized functions.
- Open system allowing customization (User Cycles and Plug-in software modules).
